Task detail

Tasks / Backend / Optimise slow SQL query

OPEN

Closes Oct 11 · 18:00

Optimise one slow SQL query, show the diff.

Find a query in your own project that drags. Profile it, fix it, and prove the improvement with numbers a reviewer can verify in one minute.

Backend | 35 points maximum | ~2 hours

Acceptance checklist

- ✔ Find a real query running slower than 500ms
- ✔ Show the EXPLAIN plan before and after
- ✔ Share the code diff in a public PR or gist
- ✔ State the measurable performance improvement

How this task is scored

Full points rules →

Clear evidence	0 - 10 pts
Quality of the fix	0 - 15 pts
Explanation	0 - 10 pts

Submit your proof

DRAFT

Good work deserves credit. Make your evidence easy to verify.

Proof link *

https://github.com/arjun/api/pull/42

Note for reviewer

I cut p95 latency from 820ms to 90ms with a composite index and reduced an N+1 query in the feed endpoint.

BEFORE YOU JOIN

A good community is built together.

A few simple ground rules keep PRAX welcoming and useful for everyone.

1. **Share work and give constructive feedback.**
2. **Respect people. Disagree with ideas, not identities.**
3. **No promotions, spam, or private-message solicitation.**
4. **Report problems. Moderators can remove or mute.**

Backend · 35 pts

Optimise one slow SQL query

Submitted by Arjun Varma · Oct 9 at 07:12

github.com/arjun/api/pull/42 ↗

Note to reviewer

Cut p95 latency from 820ms to 90ms. Added a composite index, removed N+1 calls, and included EXPLAIN output.

```
EXPLAIN ANALYZE
Index Scan using user_feed_idx
Execution Time: 90.15 ms
```

Checklist

- ✓ Measured runtime before and after
- ✓ Linked change and query plan
- ✓ Explained improvement

Your decision

Points awarded max 35

30 / 35 pts

Proof 10 / 10

Quality 13 / 15

Explanation 7 / 10

Reviewer feedback

Strong improvement and clear measurements. A short README benchmark would make this even better.

✓ Approve & award | Reject

Points are awarded only when approved.

Points Rules

Clear standards build trust

Published scoring rubric

Edit rubric

One transparent standard, visible to both administrators and members.

01 **Clear proof** — 0 - 10 pts
A reviewer should verify the evidence in less than a minute.

02 **Quality of work** — 0 - 15 pts
Correctness, polish, and matching the task checklist.

03 **Explanation** — 0 - 10 pts
Simple reasoning, documented choices and reproducible results.

04 **Going the extra mile** — 0 - 5 pts
Small optional bonus for exceptional effort.

Member-facing explanation

HOW POINTS WORK

Earn points for verified work.

Submit your task proof. Admins review your work and score against the published rubric.

Clear proof	0 - 10
Quality of work	0 - 15
Explanation	0 - 10
Going the extra mile	0 - 5

Fair scoring by design

Rules apply to future reviews. Previously approved point awards stay unchanged.
